

Where relaxation meets rejuvenation

A spa experience unique to you

Our licensed clinical aestheticians proudly offer you a peaceful escape for your mind, body and soul. Choosing between a variety of facials, peels and body treatments can be overwhelming, but we'll help analyze your skin and curate an experience based on your unique concerns.

Voted Omaha's Best Day Spa since 2012, the LovelySkin Spa has proven to be your best destination for receiving a custom spa experience. Whether you're in need of an acne treatment, skin tightening, hair removal or exfoliation, we'll make sure you leave relaxed and radiant.

Cosmetic treatments

Bringing your ideal look to life

Under the direction of board-certified dermatologist and LovelySkin CEO Dr. Joel Schlessinger, Schlessinger MD and the LovelySkin Spa have proven to be your best destinations for receiving cosmetic procedures and spa treatments.

Consistently voted Best in Omaha, Dr. Schlessinger personally performs all injections himself to ensure you get the best possible result every time. Whether you're interested in body contouring procedures like CoolSculpting or skin tightening treatments like Ultherapy, you can schedule a free cosmetic consultation to meet with Dr. Schlessinger one-on-one to establish a plan that will achieve your desired look

FACIAL REJUVENATION & SKIN TIGHTENING

BOTOX® & Other Wrinkle Relaxers

From frown lines and crow's feet to contouring the jawline, BOTOX® is designed to lift and improve wrinkles and other signs of aging without significant downtime.

Before

After Jeuveau

Dermal Fillers

Ideal for adding volume to the cheeks, lips or facial contours, as little as one treatment of hyaluronic acid fillers give your skin a lifted appearance, smooths wrinkles and fills in folds with little to no downtime.

Ultherapy

This non-invasive, non-surgical procedure uses ultrasound technology along with your body's natural healing processes to stimulate the creation of collagen for both immediate and gradual results that lift, tone and tighten loose skin around the eyes, cheeks, body and upper neck.

EndyMed Intensif RF Microneedling

Combining radiofrequency with the rejuvenating benefits of microneedling, this unique procedure encourages collagen remodeling to improve the appearance of sun-damaged skin, acne scarring, texture concerns and even stretch marks.

IPL Facial Treatment

Intense Pulsed Light, or IPL, is a gentle, non-ablative treatment that uses broad-spectrum light to improve the appearance of age spots, discoloration, freckles and uneven pigmentation. Ideal for those with active lifestyles, this innovative treatment comes with little risk and no downtime.

BODY CONTOURING & FAT REDUCTION

CoolSculpting

Controlled cooling technology developed by Harvard scientists powers this advanced body treatment that targets fat in areas like the abdomen, chin, flanks, arms and thighs. This non-invasive treatment uses no incisions or anesthesia and eliminates fat cells through the body's normal metabolic processes without damaging surrounding tissue.

Kybella

In as little as two treatments, this FDA-approved, non-surgical neck procedure noticeably dissolves fat below the jawline, meaning it addresses and eliminates the look of a "double chin."

Smart Liposuction & Tumescent Liposuction

Often used in conjunction, these less-invasive, safer methods of liposuction offer advanced results in localized fat reduction to create a slimmer body contour. Smart Liposuction is the first FDA-approved, laser-assisted liposuction procedure that targets and eliminates fat in precise areas of the body. Tumescent Liposuction uses a tiny instrument called a cannula to remove excess fat with virtually no discomfort and lessened recovery time.

Before

After Smart Liposuction

Cellfina

Innovative, proprietary technology minimizes the appearance of stubborn cellulite for smoother, more-toned skin on the thighs and buttocks. With long-lasting results that are clinically proven to last for at least two years, this treatment addresses and eliminates the structural cause of cellulite.

Qwo

Powered by an enzyme called collagenase, this injection treatment dissolves the bands that hold down skin and create the look of cellulite. With a series of treatments over a few months, cellulite can improve significantly for smoother-looking skin on your legs, thighs and buttocks.

LASER TREATMENTS

Laser Hair Removal

With options to target your area of choice, laser hair removal is a longer-lasting and generally pain-free alternative to waxing, shaving or electrolysis.

Laser Tattoo Removal

You don't have to live with tattoo regret. With two different lasers, Dr. Joel Schlessinger can treat a variety of colors and tattoo patterns that might otherwise be impossible to address. To learn about special savings, ask us about stacked or repeated treatments.

Sclerotherapy | Leg Vein Treatment

Sclerotherapy greatly reduces the appearance of varicose and spider veins in the legs. Dr. Schlessinger can target small blood vessels with incredible skill thanks to his training as a pediatrician prior to being a dermatologist where he was taught how to place IVs into premature infants. We also uses lasers to accomplish better results than those possible with sclerotherapy alone.
